

## **Leonidas ANTHOPOULOS**

**Professor, University of Thessaly, Greece**

Dr. Leonidas Anthopoulos is a Professor in e-business and strategy at the University of Thessaly, Greece. During his current mission and at his previous job positions (as an Expert Counselor at the Greek Ministry of Foreign Affairs, as a Special Advisor of the Mayor of Trikala, Greece and as an ICT project manager at the Information Society S.A. (Greece)) he planned and supervised several critical projects, worth mentioning the smart city of Trikala. He is the Director of the “Intelligent Production Systems and Smart Cities” Research Institute and the Director of the Postgraduate Program in Agile Management at the University of Thessaly, Greece.

He is a member of numerous committees, worth mentioning working for the ITU (Rapporteur of Q13 of the SG5), he is the head of the Smart and Sustainable cities’ working group for the Greek Standards, the Associate Editor of the IET Smart Cities journal etc.

In the above missions he has focused among others on the role of ICT in city resilience in terms of systemic efficiency and social coherence, and corresponding works have been developed for the smart city of Trikala and the International Telecommunications Union. He is the author and editor of several book collections, which can be found in Cities, Sustainable Cities and Society, Technological Forecasting and Social Change and Government Information Quarterly (Elsevier), ACM Computing Surveys monograph for Springer etc. His research interests concern, among others, smart city, e-Government, Enterprise Architecture, Strategic Management, etc.
